

Vaccine Rollout Based on Jurisdiction

Summary

- This document is meant to be a compilation of various government website information pertaining to announced and published individual jurisdictions' vaccine rollout plans. It is only current based on the date indicated on this document. When in doubt please check the weblink to each jurisdiction's website, contained in the following pages, for new information not yet incorporated.
- **To date:** The **Northwest Territories** is the only jurisdiction to fully prioritize, in the early stages of vaccine rollouts, individuals with intellectual or developmental disabilities who are living in their own home or with families and their support workers. Their criteria is the "gold-standard" for people with disabilities and has been included in Phase 2 (current stage). Their criteria states: "**Residents aged 18+ living with disabilities (intellectual or physical) and their caregivers**".
- **Ontario** has included specific mention of individuals with Intellectual or developmental disabilities (with the example of Down Syndrome) under individuals with high-risk conditions but have included them in the vaccine rollout timeframe for general mass delivery.
- **British Columbia** specifies under clinically and extremely vulnerable "adults 16-69 with very significant developmental disabilities for Phase 3 (April to June)
- **Saskatchewan** (Phase 2: April-June 2021) adults with very significant developmental disabilities with increased risk but are less specific in their classification or definition.
- **Alberta** (Phase 2: April – June 2021), have prioritized people age 18-64 with underlying health conditions and include severe or profound learning disabilities or severe developmental delay such as Down syndrome within the definition
- **Newfoundland** specifies individuals who are "clinically extremely vulnerable" for Phase 2 - People ages 16 to 59 who are clinically extremely vulnerable (as defined in the COVID-19 Immunization Plan). This includes adults with very significant developmental disabilities who cannot perform most activities of daily living (e.g. dressing, grooming, toileting, feeding, etc.)
- **New Brunswick** has defined complex medical conditions to include Down's syndrome
- Most provinces and territories have prioritized long term care residents and staff and other congregate living facilities and designated supported living facilities.
- Some provinces and territories have prioritized home care workers but unclear if personal support workers fall into this definition.
- **Manitoba's** future plans of a general population vaccinations rollout indicated it will be age-based approached by oldest age cohorts first with no priority given to underlying health conditions.

- Public Health Agency of Canada (PHAC) has provided guidance to provincial and territorial governments and health organizations ([Vaccines and treatments for COVID-19: Vaccine rollout - Canada.ca](#)). Provinces and territories have developed detailed vaccination rollout plans for their residents. PHAC guidance for priorities for early COVID-19 vaccination is as follows:
 - residents and staff of shared living settings who provide care for seniors
 - adults 70 years of age and older, with order of priority:
 - beginning with adults 80 years of age and older
 - decreasing the age limit by 5-year increments to age 70 years as supply becomes available
 - health care workers who have direct contact with patients, including:
 - those who work in health care settings
 - personal support workers
 - adults in Indigenous communities
 - As additional COVID-19 vaccine(s) and supplies become available, the following populations should be offered vaccinations:
 - health care workers not included in the initial rollout.
 - residents and staff of all other shared living settings, such as:
 - homeless shelters
 - correctional facilities
 - housing for migrant workers
 - essential workers who face additional risks to maintain services for the functioning of society

British Columbia: [Vaccine Rollout Plan](#)

Phase 1: Dec 2020-Feb 2021	Phase 2: Feb-April 2021	Phase 3: April-June 2021	Phase 4: July-Sept 2021
<p><u>Population:</u></p> <ul style="list-style-type: none"> • Residents and staff of long-term care facilities • Individuals assessed for and awaiting long-term care • Residents and staff of assisted living residences • Essential visitors to long-term care facilities and assisted living residences • Hospital health care workers who may provide care for COVID-19 patients in settings like Intensive Care Units, emergency departments, paramedics, medical units, and surgical units 	<p><u>Population:</u></p> <ul style="list-style-type: none"> • Seniors aged 80 and over who are not immunized in Phase 1 • Indigenous (First Nations, Métis, and Inuit) seniors age 65 and over, Elders and additional Indigenous communities not immunized in Phase 1 • Hospital staff, community general practitioners (GPs) and medical specialists not immunized in Phase 1 • Vulnerable populations living and working in select congregated settings 	<p><u>Population:</u></p> <ul style="list-style-type: none"> • People aged 79 to 60, in five-year increments: <ul style="list-style-type: none"> - 79 to 75 (D1 April, D2 May) - 74 to 70 (D1 April/May, D2 May/June) - 69 to 65 (D1 May/June, D2 June/July) - 64 to 60 (D1 June, D2 July) • People aged 69 to 16 who are <u>clinically extremely vulnerable</u> (D1 and D2 April/June): <ul style="list-style-type: none"> - Adults with very significant developmental disabilities that increase risk - Solid organ transplant recipients - People with specific cancers: <ul style="list-style-type: none"> ○ People with cancer who are undergoing active chemotherapy ○ People with lung cancer who are undergoing radical radiotherapy ○ People with cancers of the blood or bone marrow such as leukemia, lymphoma or myeloma who are at any stage of treatment ○ People having immunotherapy or other continuing antibody treatments for cancer ○ People having other targeted cancer treatments that can affect the immune system, such as protein kinase inhibitors or PARP inhibitors 	<p><u>Population:</u></p> <ul style="list-style-type: none"> • People aged 59 to 18, in five-year increments: <ul style="list-style-type: none"> - 59 to 55 (D1 July, D2 August) - 54 to 50 (D1 July, D2 August) - 49 to 45 (D1 July, D2 August) - 44 to 40 (D1 July, D2 August) - 39 to 35 (D1 July/August, D2 August/September) - 34 to 30 (D1 August, D2 September) - 29 to 25 (D1 August/September, D2 September) - 24 to 18 (D1 and D2 September)

<ul style="list-style-type: none"> • Remote and isolated Indigenous communities 	<ul style="list-style-type: none"> • Staff in community home support and nursing services for seniors 	<ul style="list-style-type: none"> ○ People who have had bone marrow or stem cell transplants in the last six months or who are still taking immunosuppression drugs - People with severe respiratory conditions including all cystic fibrosis, severe asthma and severe chronic obstructive pulmonary disease (COPD) - People with rare diseases that significantly increase the risk of infections (such as severe combined immunodeficiency (SCID), homozygous sickle cell disease) - People on immunosuppression therapies sufficient to significantly increase risk of infection (biologic modifiers, high dose steroids, AZT, cyclophosphamide) - People who had their spleen removed - Adults with very significant developmental disabilities that increase risk - Adults on dialysis or with chronic kidney disease (stage 5) - Women who are pregnant with significant heart disease, congenital or acquired - Significant neuromuscular conditions requiring respiratory support <p>Note: Once additional vaccines are approved and become available, people between the ages of 18 and 64 who are front-line essential workers or work in specific workplaces or industries may be included in the later part of Phase 3.</p>

Saskatchewan: [Vaccine Rollout Plan](#)

Phase 1: Dec 2020 – March 2021	Phase 2: April-June 2021
<p><u>Population:</u></p> <ul style="list-style-type: none"> • Long-term care and personal care home residents and staff. • Health care workers in emergency departments, intensive care units, COVID-19 wards and COVID testing and assessment staff, respiratory therapists; code blue and trauma teams; and EMS, road and air transport teams. • Residents 70 years and older in all communities • Residents over the age of 50 living in remote/Northern Saskatchewan. • Additional health care workers included in priority sequencing for Phase 1 as announced February 16, 2021. These additional workers include: <ul style="list-style-type: none"> ○ Individuals directly involved in delivering COVID-19 immunizations in Phase 2 including physicians (up to 2,600), pharmacists (up to 1,200) and other SHA health care providers involved in delivering COVID-19 immunizations; ○ Anesthesia/operating rooms; ○ All other critical care areas; ○ Hemodialysis; ○ Vaccination teams; ○ Radiology technicians; ○ ECG/echo; ○ Phlebotomy/lab workers handling COVID-19 specimens; and 	<p><u>Population:</u></p> <ul style="list-style-type: none"> • Focused on vaccinating the general population in 10-year increments: 60-69, 50-59, 40-49, 30-39, 18-29 • Targeted vaccinations to select congregate living: group homes for persons with intellectual disabilities, emergency shelters • People with underlying health conditions that are clinically extremely vulnerable: Solid organ transplant recipients. • People with specific cancers: <ul style="list-style-type: none"> ○ People with cancer who are undergoing active chemotherapy. ○ People with lung cancer who are undergoing radical radiotherapy. ○ People with cancers of the blood or bone marrow such as leukemia, lymphoma or myeloma who are at any stage of treatment. ○ People having immunotherapy or other continuing antibody treatments for cancer. ○ People having other targeted cancer treatments that can affect the immune system, such as protein kinase inhibitors or PARP inhibitors. ○ People who have had bone marrow or stem cell transplants in the last six months or who are still taking immunosuppression drugs. • People with severe respiratory conditions including all cystic fibrosis, severe asthma and severe chronic obstructive pulmonary disease (COPD). • People with rare diseases that significantly increase the risk of infections (such as severe combined immunodeficiency (SCID), homozygous sickle cell disease). • People on immunosuppression therapies sufficient to significantly increase risk of infection (biologic modifiers, high dose steroids, AZT, cyclophosphamide). • People who had their spleen removed. • Adults with very significant developmental disabilities with increased risk. • Adults on dialysis or with chronic kidney disease (stage 5).

<ul style="list-style-type: none">○ Home care (direct care providers).	<ul style="list-style-type: none">● Women who are pregnant with significant heart disease, congenital or acquired.● Significant neuromuscular conditions requiring respiratory support.
--	--

Manitoba: The province is first prioritizing health-care workers in direct contact with patients, residents in high-risk congregate living facilities and adults in Indigenous communities. Eligibility for the vaccine will then take an age-based approach, working its way from older ages through the younger ones. The plan does not make mention of underlying health conditions as a factor in who takes priority for immunization. ([Vaccine Rollout Plan](#))

	Stage 1: Started in December 2020	Stage 2: anticipated to start in April, 2021	Stage 3	Stage 4
Healthcare Workers and Congregate Living Staff	<p>Healthcare workers who provide direct patient care in:</p> <ul style="list-style-type: none"> • Critical Care Units • Designated COVID 19 wards • Emergency Departments & Urgent Care Departments • Long-term Care Facilities • Correctional Facilities • Emergency Shelters • CLDS & CFS Group Homes • Paramedics (born before 1975) • Acute care facilities (born before 1975) • Home care (born before 1975) • Laboratory workers who handle COVID-19 specimens Healthcare workers in designated COVID-19 testing clinics and COVID-19 immunization clinics 	<p>Healthcare workers who provide direct patient care of any age in:</p> <ul style="list-style-type: none"> • Acute Care facilities • Paramedics • Home Care Healthcare workers over age 60 who provide direct patient care in: <ul style="list-style-type: none"> • Primary care clinics • Dental clinics • Specialty physician clinics • Diagnostic Imaging • Outpatient laboratories • Outpatient surgical programs • Elderly day programs <p>All staff (including those without direct patient care) in:</p> <ul style="list-style-type: none"> • Licensed Personal Care Homes <p>All staff over 60 (including those without direct patient care) in:</p> <ul style="list-style-type: none"> • Congregate living facilities 	<p>All staff (including those without direct patient care) in:</p> <ul style="list-style-type: none"> • Acute care facilities • Primary care clinics • Dental clinics • Specialty physician clinics • Diagnostic Imaging • Outpatient labs • Outpatient surgical programs • Elderly day programs • Home care <p>All staff in congregate living facilities</p>	<p>All healthcare workers who work in a health care facility</p>
